

Priorities of the Hungarian Council of the EU Presidency 2024

#EBDGrafik

European Movement Germany

Assessment from the EM Germany's perspective

What is missing?

Ambition and concrete steps to defend democracy at all levels in order to protect **fair elections, the rule of law, media freedom and pluralism**

Concrete steps towards **future-proof and enlargeable reforms of the EU**, including treaty changes and real ambition to move towards majority voting in many policy areas

Commitment to continued and extensive **support for Ukraine** in its defense against the Russian war of aggression

Important for the EM Germany

- Accession process with the Western Balkan states, Ukraine, Moldova and other candidate countries must be advanced boldly and ambitiously, including tangible intermediate steps: e.g. observer status in the EP
- Intensify efforts and achieve targeted progress with regards to the new migration and asylum package, in particular respect for human rights & EU values
- Further develop the European Union & its internal market in terms of competitiveness, without neglecting all other aspects
- Political guidelines for the EU agricultural policy after 2027 must take due account of environmental protection and the fight against climate change
